

How to make organic de wormer for chicken

Organic de wormers

First chop, crush and mix garlic in both chicken feeds and water, when mixing add 1 tablespoon of garlic for every 1 litre of chicken drinking water. Alternatively, add 1 table spoon of vinegar in 4 litres of water and serve to birds. Additionally, also dry and crush pepper, thereafter mix 1% of pepper in both chicken feeds and water. Lastly, you can also deworm by mixing 100 grams of diatomaceous earth to every 1 kg of chicken feeds.

Protection of birds

Always ensure to keep chicken cages clean and dry at all times. Additionally, avoid overcrowding birds and overstocking birds. Furthermore, fence off the poultry farm and provide clean food and water to birds. Lastly, always quarantine new flock.
