

Fastest organic weight booster supplement in broilers

Pawpaw supplement benefits

First, organic supplements improve feed intake, by promoting gut health and digestion. Furthermore, it also improves feed palatability, as well as boosts both final and daily weight gain. Additionally, the supplement kills coccidia parasites and bad gut bacteria hence preventing birds from digestive infections. Lastly, it also boosts broiler meat quality due to the presence of papain compound.

Supplement preparation

To prepare pawpaw powder obtain pawpaw leaves, clean them well, air dry under shade and grind them into powder. On the other hand for preparation of the pawpaw extract to get pawpaw leaves, wash them well, smash them, and press them to get the extract. After the preparation process, add 2 grams of powder for every kilo of feeds and 5 MLS of extract per liter of drinking water.
